

Object to Proposal

Application number: 14/3732/FUL

Name: H Teal

Date and time: 13-10-2014 10:41

Comment type: Object to Proposal

Comment:

Anyone who walked the lock and the river on the Eve of last winter's spring tide would have not a shadow of a doubt that this proposal is a flood risk too far. Any restriction of flow at this point is potentially hazardous to the whole area. Any changes to flood control up river as a result of extensive flooding must be assessed before any such proposal is entertained.

There are other negative points but I will point up just two: the amount of electricity produced is about the same as the Lensbury club SAVED in one year through energy saving measures. The investment would be better spent on the more general adoption of such measures; the noise that will be produced is far from determined. Plenty of evidence exists on the detrimental effects of constant noise.
